

Language Settings

The default language of the phone is English. It supports several kinds of languages, users can choose a prefer one to use.

Press Menu-> Settings->Basic Setting->Language to enter the language list, choose the one you'd like to set on the phone.

Configuring via Web Page

Press ENTER button on the keypad of the phone to enter the Status page and find the IP address of the IP phone. Enter it (for example http://192.168.3.35) into the address bar of web browser. The default login name and password are **admin/admin**.

Note: Please locate your PC in the same network segment of the IP phone(192.168.3.X) to access the web configuration page. Please consult your network administrator or service provider for help.

Network Settings: Choose Network->WAN Port

DHCP: By default the phone attempts to contact to a DHCP Server in your network in order to obtain its valid network settings, e.g. IP address, sub mask, gateway, DNS server, etc.

Static IP Address: If your phone cannot contact a DHCP Server for any reason, you need to enter the network settings manually via Static IP Address. Please contact your internet administrator for more details.

PPPoE: If you are using the xDSL Modem, you can connect your phone to the internet via PPPoE mode. Please contact your ISP for the **User Name** and **Password** for internet access.

Note: Using the wrong network parameters may result in inaccessibility of your phone and may also have an impact on your network performance! Please contact your network administrator!

Packing List

IP Phone

Handset

Stand

Power Adapter

Ethernet Cable

Handset Cord

Assembling the Phone

1. Attach the Stand, as shown below:

Stand attached

On the wall

2. Connect Handset and Headset, as shown below:

Note: Headset is not included, should be purchased separately.

3. Connect Network and Power

There are two ways for network and power source connections. You can either connect the phone to the AC Power directly using the power adapter or to a PoE compliant switch or hub. Your system administrator will advise you on which one to use.

Note: If inline power (PoE) is provided, do not install AC adapter. Make sure the Ethernet cable and switch/hub are PoE compliant.

The phone can also share the network connection with other network devices such as PC. Connect the phone's PC Port and computer's Network Port together using an Ethernet cable, shown as below:
