

My2N App

Receive calls from intercoms via mobile

Give your residents a home they can stay in contact with **no matter where they are**. The My2N app allows them to answer video calls from intercoms remotely for a full overview of attempted visits to their home. Plus – they'll never miss a delivery again!

Try the free demo

The most reliable solution on the market

A video intercom installed at the entrance will be able to call the My2N app 99.98% of the time: it's the most reliable video intercom-to-mobile calling solution you can offer your customers.

Quick setup

You don't need to know the SIP account, authentication proxy, or firmware version to set up calls. The My2N Management Platform makes it easy for anyone to manage the configuration.

Remote functions

Control dozens of video intercoms and perform up to 4 actions remotely including opening doors, closing the car barrier, turning the lights on, or calling the elevator.

Round the clock home surveillance

Using their mobile phone, users can see what is happening outside their homes at any time. And with an external camera connected, they can even see around the corner.

24/7 reception

Direct calls to receptionists, too, so that when they're not at their desk they can answer the door using their mobile phone. Outside of business hours, a security guard can take over.

More than just calls

Residents will love the extra options My2N gives them: video surveillance before answering, call logs, or snapping photos during the call.

Technical parameters

Mobile phone

Operating system	iOS 15 and later, or Android 8 and later
App	My2N app installed
Internet connection	Wi-Fi, 3G, 4G, 5G - with slower connections, the service may not work properly, or you may experience reduced video quality

Video intercom

Video intercom type	2N IP video intercom with camera, AXIS video intercom
