The SPA-3000 is a SIP VoIP gateway with connections for 1 Telephone (FXS) and 1 Telephone line (FXO).

The FXO port allows for numerous configurations, including Long line extensions and In-line VoIP replacement. The FXO and FXS port operate as two independent gateways - two separate calls can be carried at the same time.

The SPA-3000 is able to read UK called ID on the FXO port, and write UK caller ID on the FXS port.

The SPA-3000 includes an RJ45 Ethernet for connection to a home or office LAN. The FXS and FXO lines can be independently configured and deliver clear sounding voice standards.

The device can also be remotely configured and supports inservice downloadable upgrades.
