

Clear communication drives business results

More meetings

Today's business is increasingly global with widely spread workgroups – we invest more and more time in conferences and online meetings. Time is too valuable to waste on unproductive communication or underperforming technology.

New working styles

With the increasing popularity of online meetings, huddling has become a real UC phenomenon: meetings are set up spontaneously, and not necessarily in a dedicated conference room. This kind of ad hoc conferencing requires flexibility and mobility – and solutions that work always and anywhere.

Clear communication is the key

From dedicated conference room to agile huddling solution, clear sound in every corner of the room is a fundamental factor for successful communication. Because, if audio quality is not clear, outcomes are not clear.

Truly Unified Communications

UC bears strategic importance for any business: The ability to quickly connect to devices and deliver your message with impact requires open standards and maximum connectivity.

What do managers expect from audio conferencing solutions?

USABILITY 96%

think starting a meeting should be very intuitive

CONNECTIVITY 93%

would like to add additional participants or devices to a meeting

* MEETING Managers' Needs by Millward Brown in Cooperation with Sennheiser: 155 personal, 10–15-minute telephone interviews and 16 in-depth psychological 30-minute interviews among top-level managers in Germany, the UK, the USA and Singapore. Conducted from October 2015 to February 2016. INSIGHTS2020:

www.mbvermeer.com/insights2020

AUDIO QUALITY 99%

expect the audio quality to be as good as in-person meetings

FLEXIBILITY 81%

think the solutions should be portable, so they can be used independent of location

RELIABILITY

98%

expect the systems to work without any technical issues

Conference Calls with Style and Reach

The Sennheiser Series of compact, portable speakerphones is designed to provide scalable conferencing solutions for business professionals. Flexible enough to handle a single mobile phone to a packed conference room, these speakerphones are literally plug in and talk. The series' streamlined styling, superb finish and lightweight design signal high-end quality on the desk or in the conference room.

Perfect sound

The Sennheiser Speakerphone Series ensures an outstanding communication experience. Both callers and listeners experience a more natural interaction, making conference

calls less stressful and more productive. For relaxing between calls, you can also use the speakerphone for listening to music with Sennheiser's renowned sound quality.

Scalable and flexible

The Sennheiser Speakerphone Series makes conferencing simple. With a single unit, you can put an end to searching for an available conference room and set up an impromptu conference with your customer. For larger conferences of up to 12 participants, the dual speakerphone solution brings high quality conferencing sound within reach of all participants.

SP 10 & SP 20 Speakerphone It's a conference call in a briefcase

When you're on the move, the Sennheiser SP 10 and SP 20 lightweight, compact speakerphones let you set up personal calls or small group conferences wherever you are - any room becomes your office; just plug in and talk.

SP 220 Dual Speakerphone Extend your conference reach

When you are in a hurry, it just has to work. Whether you use only one of the units for personal calls or two together for a full conference, the SP 220 dual speakerphone solution is the easiest and most flexible solution on the market. Just plug, play and communicate with exceptional sound.

Tools that get you talking

Communication in a business context can be as diverse as an impromptu online meeting in the huddle room or a well planned conference with a large screen. Whatever your situation, the wide range of Sennheiser speakerphones, featuring state-of-the-art technology, will get you swiftly connected and encourage better, more natural interaction in any conference situation.

The flexibility of our series units means that they can be used anywhere, hassle-free and easily. Because our products are 100% focused on seamless integration and ease of operation.

Plug and Play A standard USB cable

A standard USB cable connects to your PC, while powering or charging your device.

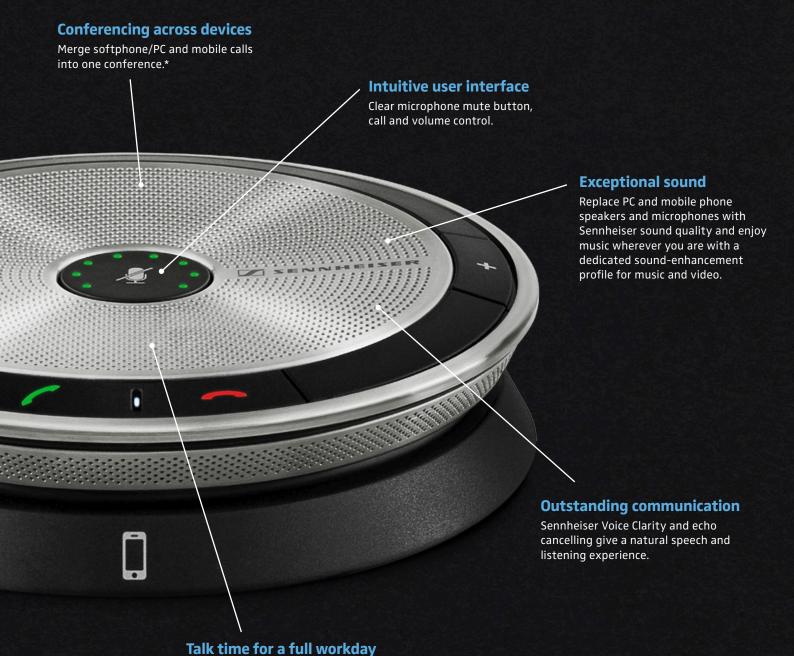

Security cable lock

Safely attach one or both of your speakerphones to the desk or to tables in meeting rooms, to reduce the risk of theft. There are three attachment options: double-sided adhesive; screwed to desk or a Kensington cable lock (not included). The Security cable lock is available as an accessory.

Ease of use

Easy cable management with built-in cable system.

SP 10 & SP 20 Speakerphone

Get up to 20 hours per charge with easy charging in just 2 1/2 hours via USB cable.* Voice prompts for low battery warning.
