

# Gigaset pro, because it's your business.

When it comes to connecting with your clients, you can't leave anything to chance. After all, communication is crucial to the success of your business. It is therefore clear what companies require of their telephone systems: outstanding performance, user-friendliness, optimal flexibility and low costs. And we now have a system that offers all of the above: the Gigaset Pro by Gigaset.

## We understand your communication objectives

For years, Gigaset has been the leading company in Europe in the field of cordless telephony.

With Gigaset Pro, we have adapted the user-friendliness of the consumer market for use in the business sector.

Gigaset Pro offers you all the advantages you could possibly need: flexibility, user-friendliness and low costs. Start-up problems and lost time are simply not an issue. Installation of the set is remarkably simple and the cost of calling is very reasonable.

Gigaset Pro is there for you. It is a solution which will provide instant and lasting benefits to your organisation. Thanks to the modular layout, the system is able to expand at the same speed as your business.

# Gigaset Pro for businesses.

## ≤7 Businesses with up to 7 employees

You are looking for a familiar and flexible communication system that will offer professional telecommunication services for your organisation. The products must be of the highest quality as well as being easy to use. Your employees will feel completely at home with this user-friendly system and will master it in a very short time.

## ≤15 Businesses with up to 15 employees

You are looking for an advanced communication solution, but a large and expensive switchboard is not necessary. You want a custom-designed solution that supports your business and fulfils all of your personal needs. Design, user-friendliness, easy installation, flexibility and low costs are key factors. Is your business set to grow in the future? If so, Gigaset Pro can grow with you. Expansion of the system is easy to realise: your employees won't even need new phones.

## ≤30 Businesses with up to 30 employees

You want a comprehensive and made-to-measure communication solution that will support both you and your clients. Gigaset Pro embodies smart design, user-friendliness, flexibility and cost management, and can be easily adapted to your particular wishes and requirements. The system offers a wealth of opportunities surrounding 'The New World of Work', including teleconferencing and home/mobile workstations. Is your business set to grow in the future? If so, Gigaset Pro can expand with you. We can easily realise an expansion of the system to accommodate up to 100 employees.

## Networks Businesses with more than one office

When a business is comprised of a number of different offices and home workers, it can prove expensive and unmanageable. Gigaset Pro can condense these different branches into one integrated telephone network. With Gigaset Pro, employees from different offices, cities, provinces or even different countries can.

## Businesses employing up to 7 employees.

You are looking for a familiar and flexible communication system that will offer professional telecommunication services for your organisation. The products must be of the highest quality as well as being easy to use. Your employees will feel completely at home with this user-friendly system and will master it in a very short time.

### Gigaset at the heart of your organisation

The Gigaset DX800A has been specially designed for small businesses and home offices. This professional multi-line desk handset can connect to VoIP, ISDN and/or the public switched telephone network. It can be expanded to accommodate six DECT devices, and is characterised by the high level of user-friendliness and recognisable user interface that you have come to expect from Gigaset.

With the Gigaset DX800A, you and your employees can conduct four calls simultaneously and at any one moment, with superior high-definition sound quality. Furthermore, the link2mobile function allows you to integrate your mobile phone into the network and to answer calls from both land lines and mobile phones. This enables optimum flexibility and maximum convenience. Furthermore, the phone has a fax port and three integrated answering machines. This is extremely useful if you wish to set different voice-mail messages for business and personal callers.

Further details regarding this solution can be found in the corresponding technical overview..

**Ready for the future**  
The DX800A prepares you for the next generation of telephone applications. Based on your personal situation, you can select from a variety of networks: VoIP, ISDN and/or analogue.

**Increase your range**  
The Gigaset DECT Repeater allows you to increase the range of the DECT phones.

**Four calls at the same time**  
The device can be extended to accommodate a maximum of six handsets, making it possible to link a total of seven work stations. It has numerous lines, which enable your employees to conduct four simultaneous outgoing calls.

**High-end phone system; Gigaset DX800A**  
A complete solution for small businesses with up to 7 employees.

**Link2Mobile**  
This allows you to integrate your mobile phone into the Gigaset network. You can answer every call received by any of the connected telephones and you can also use Gigaset phones to make mobile calls. All lines are accessible via a single handset.

**PC-integration**  
Synchronise your phone with your PC or Mac to gain access to your Outlook contacts, to select custom ringtones and to add photos.

**Easy installation**  
Installation is simple and can be done via the telephone menu or the web-based configuration procedure. The DECT handsets remove the need for wired connections. Remote management is possible.

**Choose from a range of Gigaset DECT phones**  
Gigaset has a very wide range of handsets that you can connect to the system. With Gigaset's cordless phones, you maximise the freedom of your employees during phone calls. All Gigaset handsets are compatible, from the C class to the SL class.

- C class: Comfortable and user-friendly
- E class: Shockproof, dustproof and waterproof
- S class: Business phones with an executive look
- SL class: Designer phones with aluminium casing and executive allure

**Fax connection**  
You can connect a fax machine to the analogue port of your desk phone. A separate fax number is therefore not necessary.

**Always in contact**  
The three integrated answering machines ensure that no phone call goes unanswered. You are notified of any new messages via the TFT colour display, the message button and/or via a text message.
