

Sennheiser Communications in brief

Sennheiser Communications A/S is a joint venture between the highly successful electro-acoustics specialist Sennheiser electronic GmbH & Co. KG and internationally renowned hearing health care company, the William Demant Holding Group.

By combining the high-end audio and sound reproduction experience of Sennheiser, with the miniaturisation and advanced digital signal processing technology of William Demant (Oticon), Sennheiser Communications is able to create state-of-the-art headsets that improve speech, intelligibility and listening comfort for all types of communication.

Sennheiser Communications manufactures wireless & wired headsets for mobile phones, and for offices & call centres, as well as PC & Mac computer headsets for VoIP, entertainment and gaming.

Welcome to DW Series

DW Office and DW Pro1/Pro2 professional wireless headsets are the ultimate DECT communication tools. With the focus on ergonomic perfection in wearing style and the well-being of users, DW Series headsets have been specially designed to meet the needs of all-day users and experienced professionals working in noisy environments, where the productivity benefits of switching from wired to wireless can really be appreciated.

All our DW Series headsets sound and look great and come with Sennheiser legacy best-quality speakers and ultra noise-canceling microphones, lots of talk time – and much more.

Also, because your comfort is our concern we have ensured that you get safe, high-quality headsets fitted with our patented ActiveGard™ system which protects you from acoustic shock.

Last but not least, one of the benefits of the DW Series is that they are easily paired to, and recharged on any existing DW Series base station when purchased separately.

Design & comfort

We have designed our unique DW Series headsets to provide you with the most comfortable and visually-attractive solution, giving professional users a real choice of wearing style based on their needs. So whether you go for a DW Office or a DW Pro1/Pro2 you'll find that it's never been easier to work a full day wearing a wireless headset.

Imagine making every call in comfort, and being able to focus on what's important: Dedicated and concentrated communication.

Sound quality

DW Series headsets come with all the advantages of Sennheiser HD voice clarity. By delivering a warm and more natural sound, wideband technology allows you to catch the emotional tone of your callers' voices, so you won't ever be in doubt or misunderstand a situation – even in the noisiest of environments.

Also, thanks to the Sennheiser legacy in audio, callers will sound as if they're right across from you – just like face-to-face communication.

Dialogue in motion

Experienced users of single- or double-sided headsets now have the freedom to roam around the office, while still being connected to the phone. That's why DW Series provides you with a long-distance wireless range:

Line of sight: up to 180 m
Typical office building: up to 55 m

That's dialogue in motion with ergonomic perfection in wearing style.

Full workday talk time

Employees and customers alike appreciate attention to detail when it comes to design. Seen in this perspective, Sennheiser engineers have designed the DW Series to be highly visible on the desk.

At the same time, we must recognize that a wireless headset is primarily a working tool. In other words: There has to be plenty of talk time if users want to experience all the advantages of a wireless headset.

Thanks to intelligent fast charging, all DW series headsets deliver:
8 hours of talk time in wideband mode
12 hours of talk time in narrowband mode

DW Series headsets will always provide you with a comfortable, full workday connection in the office.

DW Series

Charging
Magnetic cradle for quick and easy charging.

Battery
The power indicator shows how much time is left on the headset.

Desk phone & softphone
Switch between desk phone and softphone.

SENNHEISER

DW Office™

Wearing style 2 in 1
Choose between ear hook or headband wearing style.

Intuitive control
Mute microphone and adjust volume up or down.

ActiveGard™
Ensures hearing safety.

Microphone
Noise-canceling microphone filters out unwanted background noise.

For your comfort...

Designed for intuitive use and comfortable wearing style, our DW Office system has been a huge success. Look closely and you'll see why all the effort we put into designing an elegant compact DECT headset and base station for your desk is already ringing up the awards.

DW Pro1™

DW Series

DW Pro1/Pro2 headsets are the perfect match for all professional headset users who insist on wearing-style perfection when working in open offices, or busy service or call centers that want to go wireless.

As part of the DW Series comfort calls family, these single- or double-sided headsets are productivity enhancing propositions featuring all the latest Sennheiser headset technologies, and can easily be paired to, and recharged on any existing DW Series base station.

Microphone
